### **Artist Statement**

The main content of my work reflects cultural affiliation and social structures in settings of social institutions, roles, status positions, and relations between groups and individuals that regulates social patterns of behavior. I stage-manage narratives (stories/tales) about cultural solidarity/togetherness along with political issues through for instance video installations both within and outside public spaces.

Through several projects of artistic collaborations, I have been given the opportunity to work with different expressions, on stage as well as in gallery spaces, which has resulted in/contributed to my multifaceted expression.
